911 GT3 Cup (991 I & II)

Sitzeinlage

Seat inserts

Fahrzeug / Vehicle: **911 GT3 Cup (991 I & II)**

Bauteil / Part: **Sitzeinlage / Seat inserts**

Modell / Model **ab 2013 / from 2013**

PORSCHE

MOTORSPORT

Porsche Motorsport weist darauf hin, dass zusätzlich zu den Angaben im Handbuch Abschnitt 5.2.4. Padding System (Abbildung 1) die Regularien gemäß FIA Anhang J, Artikel 253-16 eingehalten werden müssen (Abbildung 2). Für die Verwendung von Polstern oder Schaumeinsätzen bedeutet das:

Auszug FIA Anhang J, Artikel 253-16 Stand 11.07.2019

If a foam insert is used between the homologated seat and the driver, minimum lateral support to the driver's head, shoulders and pelvis must be guaranteed as follows :

- 230mm min. at seat-side-head support along the head-plane.
- 180mm min. at seat-side-shoulder support along the shoulder-plane.
- 100mm min. in height at seat-side-pelvis support along the pelvis-plane over a length of 200mm min.

This requirement must be verified using a parallelepiped template of dimensions X 200 x Y 150 x Z 100 mm.

Die maximale Stärke der Polsterung ist dabei nicht mehr auf 50mm beschränkt. Die in Abbildung 1 grün markierten Flächen dürfen weiterhin nicht verändert werden.

MOTORSPORT

Porsche Motorsport informs that in addition to the information included in the handbook chapter 5.2.4. Padding System (image 1) the regulations according to FIA Appendix J, Article 253-16 must be respected (image 2). When using padding or a foam insert this means:

Extract FIA Appendix J, Article 253-16 version 11.07.2019

If a foam insert is used between the homologated seat and the driver, minimum lateral support to the driver's head, shoulders and pelvis must be guaranteed as follows :

- 230mm min. at seat-side-head support along the head-plane.
- 180mm min. at seat-side-shoulder support along the shoulder-plane.
- 100mm min. in height at seat-side-pelvis support along the pelvis-plane over a length of 200mm min.

This requirement must be verified using a parallelepiped template of dimensions X 200 x Y 150 x Z 100 mm.

In this case, the maximum thickness of the padding is no longer limited to 50mm. However, the surfaces marked green in image 1 must still not be changed/modifed.
